End Effects:

Odd times through: couples out after bar 4 do ½ a RH Turn and loop left during bars 5-8.

Even times through: couples out at the start of a round will be drawn into bars 5-8 and end up improper. They change places during the rest of the round and re-join again with the next round of the dance

I wrote the tune for a song (of the same name as the tune) nearly 40 years ago.

Having recently revisited the song, I found myself humming the tune as these figures started to form in my head. As the song is essentially about leaving one's home for a new but strange land, 'Emigration' seemed an appropriate title for the dance.
